NT, others

VMWare Workstation, VMWare Server, VMWare ESX, Microsoft Virtual Server, Microsoft Virtual PC

Web Technology

SharePoint 2010, MOSS & WSS 3.0, ASP.Net 1.0, 2.0, 3.0, 3.5, C# (C Sharp), .NET framework, DotNetNuke, SOAP, XML, XSL, Atlas, AJAX, ASP, JavaScript, VB Script, ADO, SMTP and POP3 (email) Automation

IIS, Application Pools, Client/Server & Multi-tier, Backend (server-side) Development, Web Hosting

CSS, Web Site Design and Maintenance, Search Engine Optimization (SEO)

Experience

1997–Present Bullseye Consulting Chelmsford, MA

President

Create and manage IT resources.

SharePoint 2010 Clients

- **Kiva Systems** – Helped roll out initial implementation of SharePoint for 200-plus users. Led projects for workflows, custom event handlers for site creation. Worked on governance, training, records management, upgrade from Standard to Enterprise, 3rd-party tool evaluations, My Site implementation, etc.
- **Power Plant Management Services** – Assist creating special SharePoint site collections for Power Plant compliance.
- **KleenEnergy** – Assist moving web site to new SharePoint Farm
- **SchoolWorks** – Custom workflows with list-based configuration, migration from WSS 3.0 to SharePoint 2010, more.
- **Edimer** –Recommendations for using WSS 3.0, help with periodic SharePoint backup
- **First Professional** – AJAX charts based on SharePoint lists, import of FTP XML into SharePoint lists using both WSS 3.0 and SharePoint 2010.
- **CakeWalk** – Gather requirements and install WSS 3.0.
- **JPal** – analyze performance problems and recommend steps for improvement.

- **SkyRope** – Maintain ASP.Net web site showing parts and prices is stored in a SQL Server Database.
- **TAC Worldwide Commission Calculations Engine** – Help design and write web application which spawns asynchronous threads to determine weekly and monthly values using nine different modules. Designed and helped implement architecture to make each module modifiable without the need to retest and deploy all the other modules.

Tools: C#, ASP.Net, Oracle 9.2, Oracle 8i, SQL, SQL Server 2000, Multiple Asynchronous Threads under IIS, Custom IIS Thread Pools, Dynamically Loaded Class Libraries, Windows Server 2003 Enterprise

Edition, CSS

Price Reporting Company:

Sole developer then project manager for many programs.

- **Price Change Alert** – Design, implement reports using “push technology” where reports are generated and emailed to customers via custom native Windows 2000 service.
- **Web Reports** – Designed, implemented, maintain and host web application and database changes to generate standard and ad-hoc Adobe Acrobat (PDF), MS Excel and HTML reports for categories to which users have subscribed. Administered entire program development life cycle. Provide web hosting.
- **CPR** – Provide maintenance work for custom software: additional import formats, tweaking UI, and reports

Tools: Delphi 2-5, Interbase 4.1, Firebird 1.50, SQL, Stored Procedures, IObjects, Report Builder, Report Smith, ISAPI DLL, JavaScript, Web Application, IIS 5.0, Windows Server 2003, Database Replication, Interdev, Delphi 2.0, Windows NT services, SMTP, POP3, Indy, BDE

- **Firebird Host** – Web hosting business on colocated server.
Tools: ASP.NET, ASP, .NET framework, Firebird SQL 1.50, Stored Procedures, SQL, HTML, JavaScript, IIS, CSS, Web Design
- **BullseyeConsulting.com** – Marketing, information site for company
Tools: ASP.NET, JavaScript, CSS, IIS, Web Design

- Many others – see below.

2006 - Present Corridor Consulting Burlington, MA

SharePoint Consultant

First Data Corporation

- Create custom Workflows
- Customize advanced search center scopes, filtering and output
- Conditionally populate list item meta-data from parent folder via event handlers
